Summary of Qualifications:

A Full-Stack Developer seeking an opportunity in Web Development, primarily on the Front-End. Excellent communicator with extensive experience in high paced environments. Professionally skilled with Front-End Web technologies such as HTML, CSS, JavaScript, and the React framework. My preferred stack features TypeScript, React, Redux, Sass or CSS-in-JS, and Jest Testing Library; however, I would love to learn new technologies.
A capable, trustworthy, hardworking individual who is respected and relied on by peers.

Technical Skills:

Front End:

- JavaScript
- TypeScript
- React
  - Redux
  - Styled-Components
- HTML
- CSS/ SASS
- Accessibility

Back End:

- NodeJS
- Express
- MongoDB/ Mongoose
- MySQL/ Sequelize

SoftwareTools/ Practices:

- Git
- ESLint
- Test Driven Development
- Jest/ React-Testing-Library
- Cypress
- Agile Development
- Deployment
  - Heroku/ Netlify

Applications:

The Manhattan Project

https://manhattan-project-uwbc.herokuapp.com/
https://github.com/mmcxii/manhattan-project

- Pushed for use of TypeScript which allowed us to catch and resolve bugs easier
- Made asset library for consistent and easy design
- Created majority of UI, state management, and file structure (on front end)

Decked Out	Let's Taco 'Bout It
https://deckedout.herokuapp.com/	https://mmcxii.github.io/lets-taco-bout-it/
https://github.com/mmcxii/decked-out	https://github.com/mmcxii/lets-taco-bout-it

- Made asset library for consistent design across app
- Made components for lifetracker, user profile, deck tracker, and modal pop-up for individual cards

- Set up SASS environment and taught teammate to use SASS
- Made components for displaying restaurants returned from Yelp search

Experience:
